2-4

```
abstract class Abstraction {
    abstract public void function();
    public void function2()
    {
        System.out.println("Function2 from class Abstraction class");
    }
}
```

```
public class assignment2Q4 extends Abstraction{
    public void function(){
        System.out.println("Function is overrided");
    }
    public static void main(String[] args) {
        assignment2Q4 a = new assignment2Q4();
        a.function();
        a.function2();

    }
}
```
